The World Health Organization is currently calling for presentations to be submitted to our annual conference on Chromosomal Mutations. Researchers who are interested in sharing their research and knowledge about these complex mutations and their impact on the characteristics of the individuals who are effected should apply here:

Click the Link:
https://WHO.UN/MutationConferenceApplication

General Research Guidelines:
1. Name of disorder
2. Cause of disorder - when, and how does mutation which causes this disorder occur
3. Karyotype of an individual with this disorder (hand drawn or photographed)
4. Characteristics/ traits caused by this mutation
5. Life expectancy
6. Impact on fertility
7. Photographs of individuals with the disorder

Additional information:
1. prevalence (how common is this disorder… generally in terms of per number of births)
2. Discovery of the disorder
3. treatment or support needed

Disorders which will be highlighted at our conference:

1. Down syndrome
2. Patau syndrome
3. Edward’s syndrome
4. Klinefelter syndrome
5. Turner’s syndrome
6. Trisomy X, (XXX females)
7. Cri du Chat syndrome
8. Fragile X syndrome
9. Angleman syndrome
10. Prader-Willi Syndrome
11. Tay-Sachs disease

Researchers should be very respectful of the individuals with the challenges of the disorders they describe.
